a masterpiece..... quote;"I am glad they made fish fillets out of those horrible voice actors" - Timo en Folkert

But if you like the game "Traffic" your going to have a blast!. This game is literally an abortion, but♥♥♥♥♥♥ it was 99 cents. Really ♥♥♥♥♥ing difficult but fun. Very hard game to play, and had no Idea that I even owned this.

took ages to get past the tutorial levels on its own.

Let alone working out the rest of the game lol

Recommend only for if you have some time to kill.. A glorious puzzle game from the same publisher as the ARMA series

ARMA has nothing on this fish themed puzzle game

Got it in the humble bundle, cute funny game thats worth the play so far.. it good. i got stuck. bad. uh. friend buy for me. fun.. How high were the creators of this game? Honestly.... This is the best game I have ever played.. Quite possibly the greatest game ever made? The depth of the puzzles and characters I have yet to come accross a game that is as deep as this one. The story of this game is so deep I don't really know where to start so I'll let you play it yourself so you can be amazed by this masterpiece. If you have not yet purchased this yet please do yourself a favor and treat yourself to this masterpiece.. If you're looking for a game that really packs a punch look no further than Fish Fillets 2. Reloaded and better than ever this sequel provides action, depth and sinister tartar sauce. Crispy fresh next level graphics accompanied by unrivaled gameplay; this innovative game will be top of the line for years to come. Don't waste another minute waiting and purchase your own copy of Fish Fillets 2 right now!. Wow. Diabolically difficult puzzler. Your little grey cells will be tested to the max from the very beginning of the game. Escaping is not so hard.... but collecting those bonus starfish certainly is. You MUST use both fish as a team to achieve your goals and be ready to think way outside the box here. If you like to be challenged then you will appreciate this game. There is pretty much one solution to any given puzzle and you need to find it to succeed. Thankfully there is a seemingly infinite undo system or you can simply restart when you feel beyond recovery. This is well worth the money as the challenges will baffle you for a worthwhile amount of time.. good gaem stel pipes help beatuy of game
